

# Dried Goods Pest Treatment Preparation Sheet

Local Pest Control will be treating your residence so as to control moths and other dry good pests

The technician will require you to prepare your suite as follows:

- Remove any items from the lower level of kitchen and/or bathroom cabinets
- Clear all, or as many, items from the floor area in all the rooms.
- Move any furniture, plants or any items against the wall away by at least 12 inches.
- Any excess clutter, toys, books, clothes etc should be taken off the floor; put them on top of a bed or something alike.
- Before we began the treatment, all occupants, including pets, must leave the unit and not reenter for a **minimum of 6 hours** after our technician arrives.
- We recommend you throw out any dried foods in your cupboards ie: spices, flour, rice, pastas etc. If you do not want to do this then you may place these items in your freezer for a minimum of 1 week.
- You may leave aquariums, but make sure you turn off the filtrations and aeration systems and cover the tank with a sheet or cloth; please leave the cover over the tank for an extra 2 hours when you get back.
- All people and pets must leave the home/suite for a minimum of 6 hours.
- **Anyone who is more prone to allergies has asthma or children under 2 years of age or expectant mothers should also leave the building for an extra 6 hours for a total of 12 hrs.**
- When you re-enter your suite you may put the items you have moved back to where they were. Please do not wipe or mop the floors or cupboard areas that we have treated. You may vacuum but do not use a wet towel or mop.

**You may open doors and windows when you first come home to air out your home.**

We will be using the following treatment:

Dragnet: Active Ingredient: Permethrin - 0.5% PCP#24175
